Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's election without traverse of Group 1, Species I and Group 2, species VI in the reply filed on 16 May 2006 is acknowledged.

Claim Objections

Claims 1-16, 21-26 and 28-35 are objected to because of the following informalities:

The recitation "a density greater than material found in the vertical geothermal well" in claims 1 and 21 should be changed to "a density greater than fluidic material found in the vertical geothermal well" to negate comparison to solid materials found in a well.

The recitation "approved by appropriate organizations for contact with ground water" in claims 1 and 21 should be changed to "approved by appropriate organizations for non contaminating contact with potable ground water".

The dependent claims are likewise objected to.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3672

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Roesch et al., U.S. 6,920,924.

Regarding claims 1 and 21, Roesch et al. discloses a sinker weight (16) attached to the geothermal piping (12,14).

Allowable Subject Matter

Claims 2-16, 22-26 and 28-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or suggest all the claimed subject matter including a plurality of ferrous weights having a water impervious coating and a cross sectional shape of a modified square being positioned below the elbow.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Thompson whose telephone number is 571 272-7037. The examiner can normally be reached on 7:00 am - 4:30 pm.
